

HALF | HUMAN

Half Human Air Bike

Featuring a robust, dual-action design for effective upper and lower body workouts, the Half Human air bike is an ultimate workout partner and a powerful, calorie-burning training tool. For a natural feel and a smooth pedalling motion, the bike has a fan resistance system delivering infinite resistance levels. With Bluetooth connectivity and an integrated tablet holder, the air bike lets you train with the compatible Zwift and Kinomap apps. Explore real outdoor routes, structured workouts with coaching and interval training, challenge your friends in a multiplayer mode or immerse yourself in exciting video-game style training. Keep track of your progress on a user-friendly 5" LCD display and choose from 8 programmes to challenge your stamina and strength.
