ROCKIT[®]

About US

ROCKIT, a premium fitness brand from Shanghai. We are devoting ourselves to the design and manufacture of fitness equipment with the company's single concept -- Right for Your Body.

ROCKIT specializes in providing commercial-grade strength training equipment, storage racks and functional training accessories, creating a set of professional solutions for gym accessories, and providing a complete solution to support related products.

ROCKIT's headquarters is located in Shanghai - one of China's most important commercial and logistics cities. Our production base is located in the Yangtze River Delta Economic Zone-Nantong, and our factory covers an area of about 2000 square meters.

ROCKIT implements LEAN manufacturing in our factory, and carries out all-round control from raw materials, manufacturing processes, to defects and inspected products. We have implemented the most efficient way to shorten lead times and provide fundamental cost saving benefits.

ROCKIT focuses on improving the safety and quality of its product line, while also paying attention to product design. We conduct our own quality inspections on each batch of the products, such as drop and tensile tests, and will continue to pay attention to the performance of the products, reflect on what our customers think, and continue to make improvements.

As a brand dedicated to producing high-quality goods, we will continue to develop and innovate new fitness equipment to enrich our product range.

Right for Your Body will always be ROCKIT's goal.
