TRACKZ Race Turf – Modular Sprint & Sled Training Surface

The **TRACKZ Race Turf** is a high-performance, modular turf system developed for the demands of hybrid functional training, including *sled push and pull exercises, sprint intervals, and multi-lane conditioning drills.*

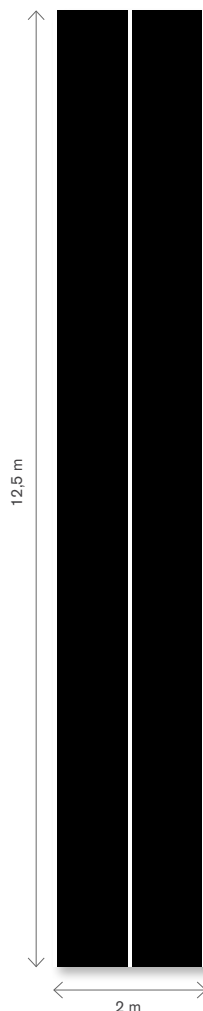

Customizable Design & Branding Options

With a palette of **18 available turf colours** and multiple start/end zone options, the TRACKZ system offers both functional versatility and visual impact. Thanks to its modular design, the layout can be adapted or expanded over time to fit evolving training needs.

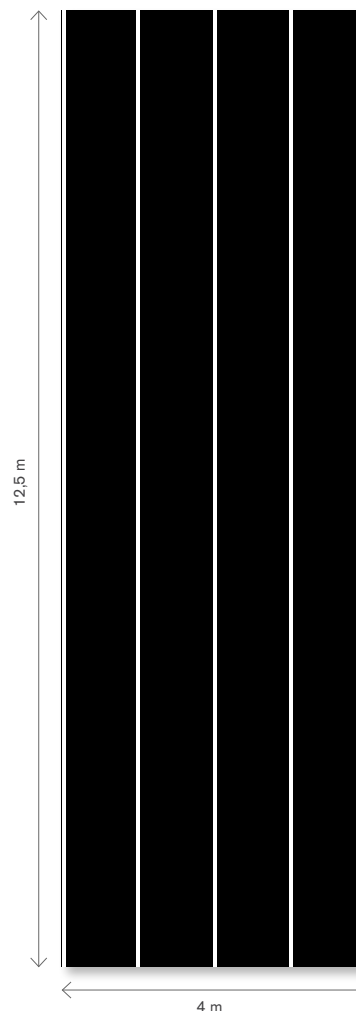

This flexible system allows for fully customizable start and end zones, in combination our uni sprint base zone.
Core components include:

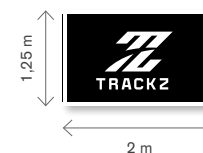

2-LANE TURF SECTION
2.000 x 12.500 mm

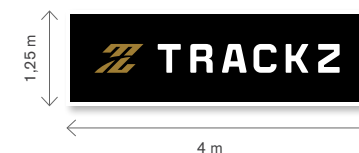

4-LANE TURF SECTION
