NAUTILUS

# XPload Premier - Decline Press

The XPload Premier Decline Press puts the lower chest on its own station. Independent arms press on a downward, converging path, and an adjustable back pad sets pre-stretch for an optimal start position. Gas-assisted seat height adjustment with a wrap-around handle fits members quickly, while knurled safety pins lock plates on each load horn and four storage horns keep plates close. Alongside the Bench Press and Incline Press, it completes a chest series that trains from three angles.
